Generative grammar is a linguistic theory that regards grammar as a system of rules that generates exactly those combinations of words that form grammatical sentences in a given language. Noam Chomsky first used the term in relation to the theoretical linguistics of grammar that he developed in the late 1950s. Linguists who follow the generative approach have been called generativists.

In linguistics, grammar (from Greek: γράμμα) is the set of structural rules governing the composition of clauses, phrases, and words in any given natural language. The term refers also to the study of such rules, and this field includes phonology, morphology, and syntax, often complemented by phonetics, semantics, and pragmatics. Speakers of a language have a set of internalized ...

Learn Dutch. Dutch spelling is quite easy compared to many other languages because it is based on a bunch of basic principles. The same goes for the conjugation of Dutch regular verbs. Once you know the conjugation rules, you can conjugate any Dutch verb. Irregular verbs, however, must be learned by heart.
