

thinking about gis geographic pdf

A geographic information system (GIS) is a system designed to capture, store, manipulate, analyze, manage, and present spatial or geographic data. GIS applications are tools that allow users to create interactive queries (user-created searches), analyze spatial information, edit data in maps, and present the results of all these operations.

Geographic information system - Wikipedia

2 Careers in Cartography and GIS is published as a service to the discipline by the Cartography and Geographic Information Society (CaGIS) which is solely responsible for its content. It is an updated version (2008) of brochures by the

Cartography and GIS
